

**AQUA·AID**  
SOLUTIONS

# Verde-Cal<sup>®</sup> MG

**Enhanced Dolomitic Lime**

Delivers highly available calcium and magnesium to improve soil structure and nutrient uptake.

Corrects acidic conditions while supplying calcium and magnesium to improve aggregation, infiltration, and plant-available water.

Delivers faster, more efficient results at just one-quarter the rate of standard dolomitic lime applications.

# Verde-Cal<sup>®</sup> MG

## Enhanced Dolomitic Limestone

### KEY FEATURES

- Delivers highly available calcium and magnesium to improve soil structure and nutrient uptake.
- Raises soil pH quickly – 500 lb/acre can increase pH by ~1 point within 30–45 days (water quality dependent).
- Provides the same impact as 1 ton of standard dolomitic lime, but at one-quarter the rate.
- Enhances soil aeration, loosens compacted/heavy clay soils, and improves water percolation.
- Fast response due to its proprietary manufacturing process that increases product reactivity in the soil.

### COMPOSITION

#### Active Ingredients

21%	Calcium (Ca)
12%	Magnesium (Mg)
30.9%	Calcium Oxide (CaO)
20.3%	Magnesium Oxide (MgO)
55.2%	Calcium Carbonate (CaCO <sub>3</sub> )
42.6%	Magnesium Carbonate (MgCO <sub>3</sub> )

### APPLICATION INSTRUCTIONS

To maintain optimum pH and growing conditions, apply VERDE-CAL MG at 5 - 10 pounds per 1,000 ft<sup>2</sup> or 500 pounds per acre (560 kg/ha) at least twice per growing season, or as needed. Soil test recommendations should be used to determine liming needs.

To adjust pH, apply VERDE-CAL MG at 10 pounds per 1,000 ft<sup>2</sup> or 500 pounds per acre (560 kg/ha). In most soils this will raise the soil pH up to one full point. Retest and if needed, reapply at this rate.
