GENERAL INFORMATION

Turf Power is derived from earthworm castings in a controlled environment setting. Turf Power can improve soil and soilless mixes. Use Turf Power as part of a well-rounded turfgrass and ornamental plant fertility program.

DIRECTIONS FOR USE

Turf Power can be applied to all ornamental plants, trees, turf, lawns, landscape shrubs, and flowers.

Turf Application Golf, Lawns, and Sports Turf

Apply Turf Power as a soil spray at 8 ounces per 1,000 ft² in 2 gallons of water (25 L/ha in 800 L) at 15 day intervals or 16 ounces per 1,000 ft² in 2 gallons of water (50 L/ha in 800 L) at 30 day intervals. For best results, Turf Power should be watered in immediately after application and requires season long application programs.

Horticultural Root Drench Application

Apply Turf Power at 10 ounces per gallon of water (80 ml/L) every three weeks or 3 ounces per gallon of water (24 ml/L) weekly throughout the growing season.

Do not apply if a heavy rain is expected. Do not apply near water, storm drains, or drainage ditches. Apply only to intended application area.

HAZARD STATEMENT(S)

The product is not classified as hazardous. No known significant effects or critical hazards.

PRECAUTIONARY STATEMENT(S)

Keep out of reach of children. Read label before use. In case of eye contact, flush eyes with water. If swallowed, give water or milk. If eye or skin irritation occurs or you feel unwell, get medical advice/attention.
