

**AQUA·AID**  
SOLUTIONS

# Conduit90<sup>®</sup>

**Long Term Hydrating Surfactant**

Provides long-term moisture management and combats soil water repellency for up to 90 days.

Delivers consistent turf quality and uniform moisture even through drought or heavy rainfall.

Safe and effective for early-season use or during extreme heat to prevent localized dry spots.

# Conduit90<sup>®</sup>

## Long Term Hydrating Surfactant

### KEY FEATURES

- Long-term soil surfactant that provides consistent turf management in both drought and excessive rain.
- Relieves soil water repellency to maintain a uniform moisture profile throughout the root zone.
- Prevents localized dry spot formation when applied early in the season.
- Safe and effective for use during extreme heat or drought without risk of turf damage.
- Promotes deep and even water and nutrient movement through the soil.
- Delivers lasting performance for up to 90 days in the soil profile.

### COMPOSITION

**Conduit 90** Long-term Soil Surfactant is a non-toxic, nonionic, non-flammable, non-corrosive and biodegradable formulation of soil surfactants.

**Active Ingredients:**

99% Alkoxylated polyols

1% Water

**Conduit 90** Long-term Soil Surfactant is available in 55, 30 and 2.5 gallon recyclable containers.\*

\*Check with your distributor for availability.

### APPLICATION INSTRUCTIONS

Conduit 90 should be applied early in the season before localized dry spot conditions and formations occur.

#### LIQUID

**Full Rate Application**

Apply 16 ounces per 1,000 ft<sup>2</sup> in 5 gallons of water (50 L/ha in 2,000 L). Reapply after 90 days or as needed.

**Split Application**

Apply two applications 7 to 10 days apart at 8 ounces per 1,000 ft<sup>2</sup> in 2.5 gallons of water (25 L/ha in 1,000 L). Reapply a split application after 90 days or as needed.

Irrigate after each application to remove the surfactant from the plant surfaces.

#### GRANULAR

Apply two applications 7 to 10 days apart at 3.25 lbs per 1,000 ft<sup>2</sup> (160 kg/ha). Reapply a split application after 90 days or as needed.

Irrigation is necessary to release Conduit 90 from the carrier. Irrigate before next mowing or leave baskets off.
